### Mobile Pump-Out SP-510

### Attachments :

The portable SP-510 is built with the customer in mind. Assembled using all stainless steel hardware and a heavy duty marine grade aluminum frame, the SP-510 is built to last. 9" stainless steel locking swivel casters and 18" pneumatic tires allow the SP-510 to effortlessly move throughout your facility. The SP-510 is a great way to offer boaters a quick and clean pump-out, without the hassle of expensive plumbing. The SP-510 has a tank overfill protector that automatically shuts the pump off when the tank is full, preventing messy mistakes.

All pump components are assembled using non-corrosive materials. This pump is designed specifically for pumping sewage.
