

Gender Equality Plan

The Gender Equality Plan for the Regional Municipality of Bornholm aims to focus on creating equal opportunities for all despite sex, age, ethnicity, disability, religion, political views, sexual orientation, social and national origin.

Gender equality between women and men means that all staff workers will be treated equal. It means equal opportunities for employment, education, promotion and equal payment for similar work.

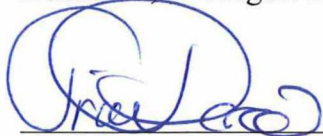

The Gender Equality Plan covers all units and working places in the regional municipality, and it meets the criteria from eg. European Commission in relation to the Horizon Europe programme, as well as recommendations from the Danish Ministry for Education and Research, such as data and monitoring, dedicated resources, capacity building and training.
